Dear ITS Customer Support & Student Enablement,

I am writing to express my interest in the Student Technology Specialist position (Requisition DU14165) with ITS Customer Support & Student Enablement at the University of Kentucky. As a dedicated Information Communication Technology student at UK, I am excited about the opportunity to support my fellow Wildcats by providing excellent technical assistance, whether in person or remotely, throughout the Spring 2026 semester.

Through my coursework in Linux systems administration, security informatics, networking fundamentals, hardware and software deployment, and database systems, I have developed a strong technical foundation that aligns well with the core duties of this role. My hands-on experience troubleshooting a variety of software and hardware issues, combined with my commitment to learning new systems, makes me confident in my ability to help users resolve technical challenges quickly and professionally. I am proficient with Windows and familiar with macOS and Android environments, and I continue to expand my technical skills through ongoing training and preparation for CompTIA certifications.

In my previous roles, including administrative support at C&S Transportation and as a Rock Wall Supervisor at UK Campus Recreation, I have built solid customer service, communication, and problem-solving skills. I frequently assisted with various technical issues and developed unique solutions to improve workflow. These experiences strengthened my ability to explain technical concepts clearly to individuals with different levels of computer experience.

For the spring semester, I am taking mostly online classes with the exception of Tuesdays and Thursdays from 9:30am to 10:45am. I am available to work 10–20 hours per week, and I am eager to contribute to your team by assisting with troubleshooting, ticket documentation, and guidance for students accessing services like Eduroam and essential software.

Thank you for considering my application. I would welcome the opportunity to further discuss how my background, motivation, and technical skills can benefit the ITS Customer Support & Student Enablement team.

Sincerely,
Frankie Lin
